Chairman's Message

“

The Sultan Tobacco Company has been well-known in the tobacco industry for the past four decades. Our commitment to quality and innovation drives us forward every day. We believe in building lasting partnerships and delivering excellence in every product we offer.

From our integrated Green Leaf Threshing facility in Swabi to importers and manufacturers across four continents, every leaf we ship carries the trust we have earned over decades. As we look ahead, our focus remains the same — quality without compromise, partnerships built on integrity, and a vision that reaches well beyond our borders.

Chief Executive Officer
SULTAN **T**OBACCO COMPANY

About Sultan Tobacco

Sultan Tobacco Company is a well-known private company that has built a strong reputation in the tobacco and smoking industry over the past four decades. During its long tenure, the Company saw many peaks and valleys but was successful in securing its presence in the sector.

Sultan Tobacco has won high business awards for its clear and ambitious, high-quality and vibrant vision and enjoys the status of being among the few leading Pakistani companies in the tobacco industry. The company is striving to expand its operations globally through an established distribution network in parts of Far East Asia, Eastern Europe, South and West Africa, Central and South Asia and the Middle East.

With internationally recognized brands, a fully integrated production facility and a wealth of knowledge and expertise, Sultan Tobacco is well positioned to provide integrated tobacco and tobacco products. We have the best quality brands, private label cigarettes, filter sticks and other non-tobacco items in our portfolio.

FOUNDED

Four decades of heritage

HQ

Swabi, KPK, Pakistan

FOCUS

Integrated GLT & exports

Vision · Mission · Values

Our Vision

To outperform nationally and internationally and be on top through teamwork, quality, brand recognition and customer service.

Our Mission

To expand the presence of our brands and operations globally through a network of reliable partners, suppliers and distributors.

CORE VALUES

1

TRUST

Built on four decades of reliable partnerships and consistent quality delivery.

2

INTEGRITY

Honest dealings, transparent processes and ethical business at every touchpoint.

3

PASSION TO WIN

Relentless drive for excellence in product, service and global reach.

4

LEADERSHIP

Setting standards in the Pakistani tobacco industry and beyond.

5

OWNERSHIP

Every team member takes pride and responsibility in our shared success.

INDUSTRY AWARDS

7,500

KG/HR CAPACITY

Four decades of operating heritage, a 7,500 kg/hr Green Leaf Threshing capacity, and an export footprint spanning 15+ countries make Sultan Tobacco one of Pakistan's most trusted integrated tobacco suppliers.

Green Leaf Threshing

Green Leaf Threshing (GLT) is a processing plant which processes green leaf for cigarette factory and export. This factory processes all types of tobacco leaf for cigarette use.

The plant receives raw tobacco from farmer level, which then comes to the plant for threshing. First it reaches the feed table, then maintaining the required moisture it goes to the thresher for separating the mid-rib (stem) and lamina.

The separated lamina goes to the lamina dryer for drying to the required moisture level, then to the auto press for 200 kg packages. Process line scrap after drying goes for 50 kg bags. Finally, all products after 72 hours of cooling are sent for warehousing.

1 Receiving

Raw tobacco from farmer level

2 Threshing

Separating mid-rib & lamina

3 Packaging

Auto press for 200 kg packages

Process Flow

01 Receiving

Raw tobacco from farmer level arrives at the plant feed table.

02 Threshing

Separating the midrib (stem) from lamina at controlled moisture.

03 Drying

Lamina dryer brings the leaf to required moisture specification.

04 Pressing

Auto press for 200 kg lamina packages; 50 kg bags for scrap.

05 Cooling

72 hours of controlled cooling to stabilise the product.

06 Warehousing

Finished goods stored under climate control, ready for shipment.

Quality control runs through every step. Moisture, particle size, foreign-matter and chemistry checks are performed at receiving, post-threshing, post-drying and pre-shipment to guarantee export-grade consistency for every C-48 case leaving our facility.

Specifications & Highlights

WHOLE LOOSE LEAF

Loose Leaf (LL)

Whole, uncut cured tobacco leaves supplied in loose form without binding. LL preserves the natural length, color, and aroma of the leaf and is preferred by manufacturers who handle their own primary processing. Available across all our grades — Virginia, Burley, Dark Air-Cured, and Rustica.

FORM Whole Loose Leaf	MOISTURE 13 – 14%
PACKING Bales 80 – 100 kg	ORIGIN Swabi, KPK
SEASON: Year-Round Supply	SOIL: Loamy / Sandy Loam

THRESHED LAMINA

Threshed Tobacco (TT)

Mechanically threshed tobacco lamina produced at our Green Leaf Threshing (GLT) facility — leaf separated from stem, classified by particle size, and redried to consistent moisture. TT is the workhorse format for cigarette manufacturers worldwide, available across Virginia, Burley, and Dark Air-Cured grades.

FORM Threshed Lamina	STRIP SIZE >2 inches
MOISTURE 12 – 13%	PACKING 200 kg C-48 Cases
SEASON: Year-Round Processing	SOIL: Multi-Origin Blends

Specifications & Highlights

HAND-STRIPPED & REDRIED LAMINA

Redried Hand Strips (HS)

Premium lamina hand-stripped from the midrib leaf-by-leaf, then redried to controlled moisture for stable long-term storage. HS preserves maximum leaf size, color, and aroma — preferred by premium cigarette blenders and cigar manufacturers who demand unbroken, character-rich tobacco.

FORM

Hand-Stripped & Redried

MOISTURE

12 – 13%

STEM CONTENT

<2%

PACKING

200 kg C-48 Cases

SEASON: Year-Round Processing

SOIL: Selected Loamy Soils

THRESHED LONG MIDRIBS

Long Stem

Long-cut tobacco midrib stems separated during the Green Leaf Threshing (GLT) process. Used in reconstituted tobacco sheet manufacturing, expanded stem production, and as a controlled filler for cigarette blends to optimize burn and yield.

FORM

Long Cut Stems

LENGTH

>25 mm

MOISTURE

12 – 13%

PACKING

200 kg C-48 Cases

SEASON: Year-Round Processing

SOIL: Multi-Origin Blends

Specifications & Highlights

SHORT-CUT MIDRIBS

Shorts Stem

Short-cut tobacco stem fraction produced during threshing and classification. Ideal for reconstituted tobacco sheet, expanded stem applications, and blend optimization where smaller stem geometry is required for downstream processing.

FORM Short Cut Stems	LENGTH 5 – 25 mm
MOISTURE 12 – 13%	PACKING 200 kg C-48 Cases
SEASON: Year-Round Processing	SOIL: Multi-Origin Blends

FINE LEAF PARTICLES

Scrap

Fine tobacco lamina particles and dust recovered during threshing, classification, and packing operations. Scrap is widely used in reconstituted tobacco sheet production and as a cost-effective blend component for selected cigarette and smokeless tobacco categories.

FORM Fine Particles / Dust	PARTICLE SIZE <3 mm
MOISTURE 12 – 13%	PACKING Bales / Cases
SEASON: Year-Round Processing	SOIL: Multi-Origin Blends

Grades & Chemistry

Pakistan-origin tobacco grades with verified nicotine and sugar profiles for blenders and manufacturers.

GRADE	NICOTINE (%)	SUGAR (%)	PLANT POSITION
FCV MML	2.4 – 2.5	15 – 16	Lower Middle
FCV MMO	2.5 – 2.6	14 – 15	Middle & Top
FCV BMMO	2.6 – 2.7	16 – 18	Middle & Top
FCV MMC	2.3 – 2.4	13 – 14	Mix
FCV MMD	2.1 – 2.2	11 – 12	Mix
Burley BR-1	3.1 – 3.3	NA	Middle
DAC-1	3.0 – 3.1	NA	Middle
Rustica RUS-4/5	4 – 5	NA	—

FCV = Flue-Cured Virginia · **BR** = Burley · **DAC** = Dark Air-Cured · **RUS** = Rustica.

All chemistry figures are typical seasonal averages from independent lab analysis; precise specs available on request.

Export Destinations

Why Choose Sultan

01 Integrated GLT

7,500 kg/hr Green Leaf Threshing capacity — control over quality from farm to case.

02 Verified Chemistry

Lab-tested grades with documented nicotine and sugar profiles for every shipment.

03 Global Distribution

Active across 8+ flagship markets including USA, UAE, Europe, China and Vietnam.

04 Premium Origins

KPK-grown FCV, Burley, Dark Air-Cured and Rustica with selected loamy soils.

05 Flexible Forms

LL, TT, Hand-Strips, Long & Short Stems and Scrap — packed to your specification.

06 Four Decades

Heritage, awards and lasting partnerships built on integrity and consistent delivery.
